

# GreenClean® LIQUID ALGAECIDE

# FX

## Need To Know

GreenClean®FX Liquid Algaecide is a commercial strength liquid algaecide for treatment and control of algae conditions in backyard water features. The low GreenClean FX application rates make GreenCleanFX a highly effective and affordable solution to a wide variety of algae conditions.

### Fast Acting Control of Algae in Containerized Waters

- For string algae and planktonic algae (Pea Soup)
- Low Rates (1 - 2 tsp per 50 gallons of pond water)
- Cost effective
- Same chemistry as GreenClean Granular in a liquid
- Great for ponds, pondless waterfalls and fountains

### WHERE CAN I USE THIS PRODUCT?

Use it to suppress, control and prevent algae in containerized waters such as:

- Water Gardens
- Fish Ponds
- Ornamental Pools/Ponds
- Ornamental Waterfalls
- Fountains

### WHAT CAN I EXPECT TO SEE AFTER APPLYING THIS PRODUCT IN MY POND?

This products treatments are immediately apparent right after application. Bubbling, bleaching and discoloration of algae will occur. It is also beneficial to remove dead algae after treatment to help lessen the load of decaying organic matter in the pond.

### WILL IT AFFECT THE pH LEVEL OF MY WATER?

It will not affect the pH level of the Pond or Water.

Algae Density	Tsp GreenCleanFX /50 gal.	Fl. Ounces GreenCleanFX / 500 gal.
Low	1	1.7
High	2	3.4

Repeat dose every 3 days until algae is under control. Once algae control is achieved, apply once a week on a preventative basis.

*Tip: Apply more often during the summer months when water consumption and temperatures are high.*

### WHAT ARE SOME RECOMMENDATIONS FOR APPLYING THIS PRODUCT?

- Apply to area of pond with greatest water flow to facilitate rapid and adequate mixing.
- Apply early morning under sunny, calm conditions.
- Remove excess algae growth from pond/fountain to reduce the amount of decaying organic matter in the pond.

continued on back

- A second application may be necessary for heavy algal surface mats and blooms.
- Can also be mixed in a bucket of pond/fountain water and distributed around the inside perimeter of the pond/fountain.

### **HOW DOES THIS PRODUCT WORK?**

It is an activated peroxide liquid algaecide that suppresses, controls and prevents algae-causing conditions in ponds that works right away, oxidizing algae cells and killing them on contact. This product is a "Green" alternative to harsh Chlorine and Copper chemicals.

### **IS THIS PRODUCT SAFE TO USE AROUND MY FISH, PETS AND CHILDREN?**

It is a fish, pet and family friendly addition to the complete GreenClean line of algaecides, bacteria and colorant.

### **WILL THIS LEAVE A RESIDUAL BEHIND?**

No, GreenCleanFX breaks down into water and oxygen.

### **HOW IS THIS PRODUCT DIFFERENT THAN GREENCLEAN GRANULAR?**

It is a specially formulated, activated Peroxygen based liquid algaecide that utilizes the same algae killing mode of action as GreenClean Granular. There is a slight visual difference between the two as they both work to kill algae through the power of oxidation. This product has the same environmental benefits as GreenClean Granular, breaking down into water and oxygen, while leaving behind no residual behind in the environment.

### **WHAT OTHER PRODUCTS DOES BIOSAFE SYSTEMS HAVE?**

BioSafe Systems has a complete pond care line ranging from EPA registered algaecides to a blue colorant.

Below is the full product line:

- ✓ GreenClean Granular Algaecide
- ✓ GreenCleanFX Liquid Algaecide
- ✓ GreenClean Tablets
- ✓ GreenClean XTREME Liquid Bacteria
- ✓ GreenClean pH UP
- ✓ GreenClean pH DOWN
- ✓ GreenClean Pond02+
- ✓ GreenClean Blue Colorant
